EDUCATION

SRM Institute of Science and Technology — ***June 2023 - May 2027***
Bachelor of Technology Computer Science and Engineering — Ghaziabad, Uttar Pradesh, India
Relevant Coursework: Data Structures & Algorithms, OOPs, Operating Systems, DBMS, Computer Networks, Automata Theory

Shivam International School, Phulwaria — ***May 2023***
(CBSE Board | PCM) — Patna, Bihar, India

Patliputra Central School, Krishna Vihar — ***May 2021***
(CBSE Board) — Patna, Bihar, India

PROJECTS

Full-Stack Vehicle Rental Platform
React, TypeScript, Node.js, Express.js, MySQL, JWT — Live GitHub

- Architected a dual-sided marketplace with **Role-Based Access Control (RBAC)**, enabling secure, permission-gated interactions between vehicle owners and renters.
- Optimized backend query performance using MySQL indexing and carefully structured SQL joins, improving response times for high-read endpoints.
- Built a reusable component library with shadcn/ui and Tailwind CSS, creating a consistent design system that accelerated UI development across the application.
- Implemented secure authentication using **JWT** and **Bcrypt** with protected routes for transaction data and user profiles.

WebJanak : Text-to-UI Generator
React.js, TypeScript, Node.js, Express.js, Python, Flask, LoRA Fine-tuning — Live GitHub

- Built a privacy-first, offline UI generation system by integrating locally-hosted **Qwen LLM** (via llama-cpp-python) with a Node.js/Express backend along no external API calls or cloud costs.
- Created a **custom fine-tuning dataset** and applied **LoRA adapters** to tailor the model specifically for generating semantic HTML/CSS from natural language prompts.
- Authored end-to-end technical documentation detailing software functionalities and system architecture, successfully concluding the core development phase under the guidance of a Scientist 'C' at C-DAC.

School ERP System
Next.js, Node.js, Prisma, PostgreSQL, Redis, ESP32, Azure — Live GitHub

- Designed a full-stack scalable School ERP System with **Next.js** and **Prisma**, delivering four role-based dashboards (Admin, School, Student, Teacher) for complete school management.
- Integrated **Upstash Redis** caching and **Cloudinary** for media storage, reducing database load and improving response times for frequently accessed or static resources.
- Engineered a custom **IoT SMS gateway (ESP32 + SIM800L)**, replacing cloud SMS APIs with fixed-cost hardware to deliver real-time OTP, attendance, and payment alerts.
- Deployed the production application on **Azure App Service** (Central India region), managing environment configuration and continuous deployment via GitHub Actions.

TECHNICAL SKILLS & CERTIFICATIONS

- **Programming Languages:** Python, C++, Java, JavaScript, Golang, SQL
- **Web Technologies:** React.js, Next.js, Node.js, Express.js, REST APIs, Tailwind CSS
- **AI / ML:** PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, LangChain, LLM Fine-tuning
- **Cloud & DevOps:** AWS (EC2, S3), Azure (App Service), Docker, GitHub Actions
- **Databases:** MySQL, MongoDB, PostgreSQL, Pinecone (Vector DB)
- **Tools:** Git, Linux, Postman

Certifications:

- Google Associate Cloud Engineer Certification </>
- NPTEL Elite Applied Accelerated Artificial Intelligence </>
- NPTEL Elite Natural Language Processing </>
- SnowPro Associate: Platform Certification </>

AWARDS & ACHIEVEMENTS

- **1st Prize** in **Hyperthon Hackathon** at **SRMIST**. </>
- **Finalist** in **CODEWIZARD 2.0** at **SRMIST** and **CODE4CAUSE 2.0** at **NSUT Delhi**. </>
- Completed **AI & Data Science Training Program cum Internship** at **CDAC Patna**. </>
- Solved **200+ problems on LeetCode, GFG and HackerRank** (5-Star in Problem Solving & SQL). </>
- Co-authored an **IEEE conference paper** on **multi-agent Agentic RAG architecture for intelligent information retrieval**.
- **Creative Core Member** at GFG Student Club & KALAMGIRI and organized 4 Events for **1000+ attendees**.
